

A Money-back GUARANTEE Full of Holes from VACMASTERS

We will prove that our air-vacuum excavation systems really work in your soil at no risk to you.

It's a genuine *pothole-like-it-is*, no-holes-barred offer*. That's how confident we are that you'll like air's speed, efficiency, and safety compared to water. You, too, can reap the following benefits:

- lower potholing costs,
- reduced damage claims,
- holes dug cleaner and faster in most soils,
- backfilling with the dry spoils (no mud disposal),
- less roadbed disturbance,
- safer for utilities and operator.

If the system you select is not everything *we* say it is and if it's not everything *you* think it should be, we'll refund your money. There's absolutely no risk, no hassle on your part. It's an honest-to-goodness, 100% money-back guarantee. What have you got to lose...except your belief that air won't perform better than water in your soil?

There's a VACMASTERS air-vacuum excavation system designed to do your jobs, big or small, and all have water on board as a backup.

SELECT ONE OF THESE VACMASTERS SYSTEMS:

SYSTEM 4000: Our largest, most powerful system, delivering groundbreaking performance in rock-hard soil.

SYSTEM 3000: Mid-sized, compact, powerful, highly maneuverable 1-ton chassis. Dig a 12" x 12" x 5' deep pothole in 7-8 minutes.

SYSTEM 1000: Low cost, small size, skid-mounted for trailer or truck installation. Our most affordable air-vacuum system.

Join more than 400 VACMASTERS system operators throughout North America and put air-vacuum excavation to work for you. See our demo online at www.vacmasters.com or call or e-mail us.
